Description

The Mardi Himal Short Trek explores the trails in the Annapurna region of Nepal and is situated towards the east of Modi Khola across the valley from Hiunchuli. The Trek is unique and provides an [off-the-beaten-path](#) trekking experience.

The difficulty level of the trek is moderate and requires an average of 10 days to complete. The Mardi Himal Short Trek requires a good level of physical fitness. The trekkers cross through dense Rhododendron forests and a variety of vegetation, charming villages, and terraced fields before reaching the Mardi Himal Base camp at an elevation of around 4500m. To get the most out of this experience trekkers are suggested to backpack through the region during the months of March to May or September to December.
